Task 1 – Portfolio Website Design

You are building a personal portfolio website to showcase your work.

Requirements:

Create sections for About Me, Projects, and Contact.

Use AI to:

- Suggest color palettes and typography.
- Create a responsive layout with Grid/Flexbox.
- Add smooth scrolling navigation.

CODE:

```
<!-- create a portfolio website to showcase my work and skills
create sections for AboutMe, Projects, and Contact, suggest color palettes and typography
and create a responsive layout with grid/Flexbox and add smooth scrolling navigation -->

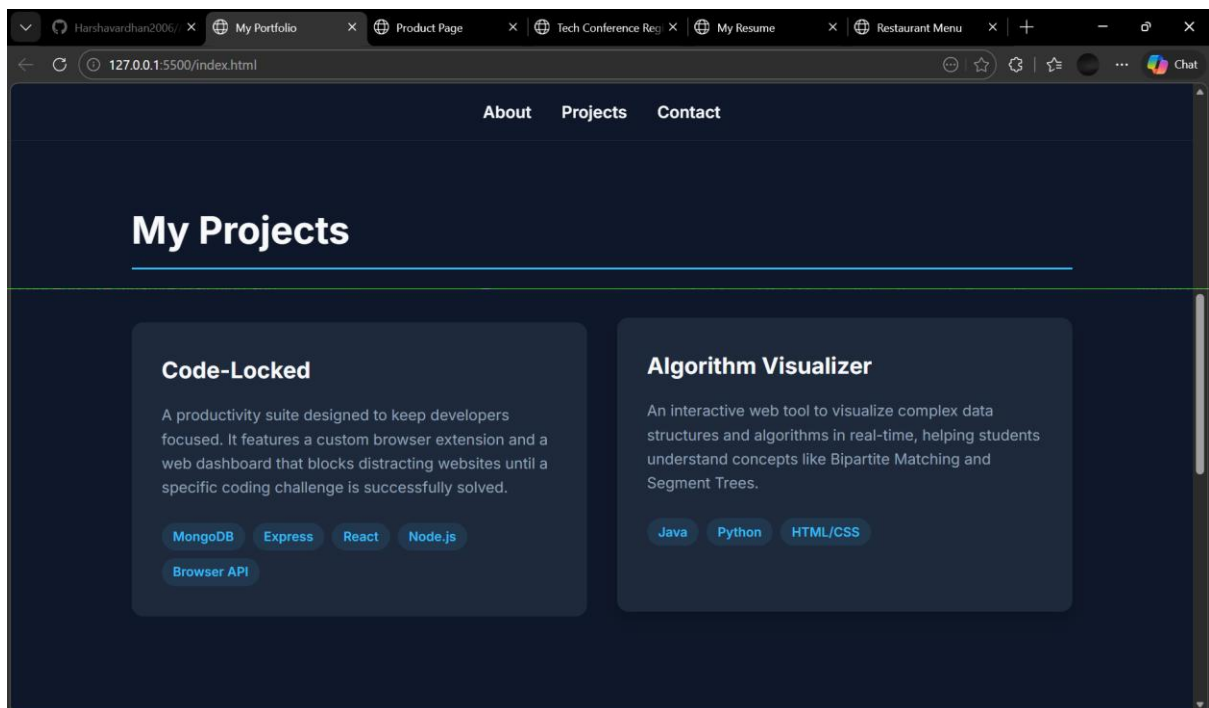

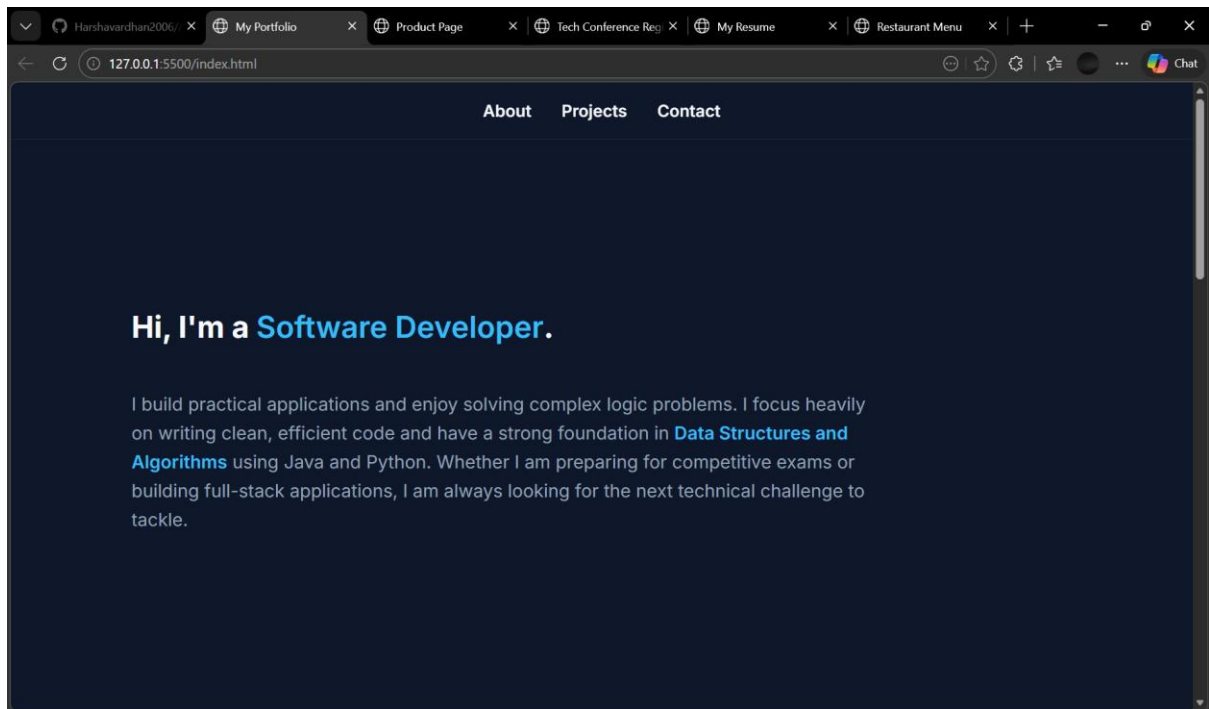

<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>My Portfolio</title>
  <link href="https://fonts.googleapis.com/css2?family=Inter:wght@300;400;600;700&display=swap"
    rel="stylesheet">
  <style>
    /* Color Palette & Typography */
    :root {
      --bg-color: #0f172a; /* Deep Slate */
      --surface-color: #1e293b; /* Lighter Slate for cards */
      --accent-color: #38bdf8; /* Cyan/Light Blue */
      --text-main: #f8fafc; /* Off-White */
      --text-muted: #94a3b8; /* Gray */
      --font-main: 'Inter', sans-serif;
    }

    /* Base Styles & Smooth Scrolling */
    html {
      scroll-behavior: smooth;
    }

    body {
      margin: 0;
      padding: 0;
      font-family: var(--font-main);
      background-color: var(--bg-color);
      color: var(--text-main);
      line-height: 1.6;
    }

    a {
      text-decoration: none;
      color: var(--accent-color);
    }
  </style>
</head>
```

Output:

Task 2 – Online Store Product Page

Design a product display page for an online store.

Requirements:

Display product image, title, price, and "Add to Cart" button.

Use AI to:

- Style with BEM methodology.
- Make layout responsive.
- Add hover effects and "Add to Cart" alert.

CODE:

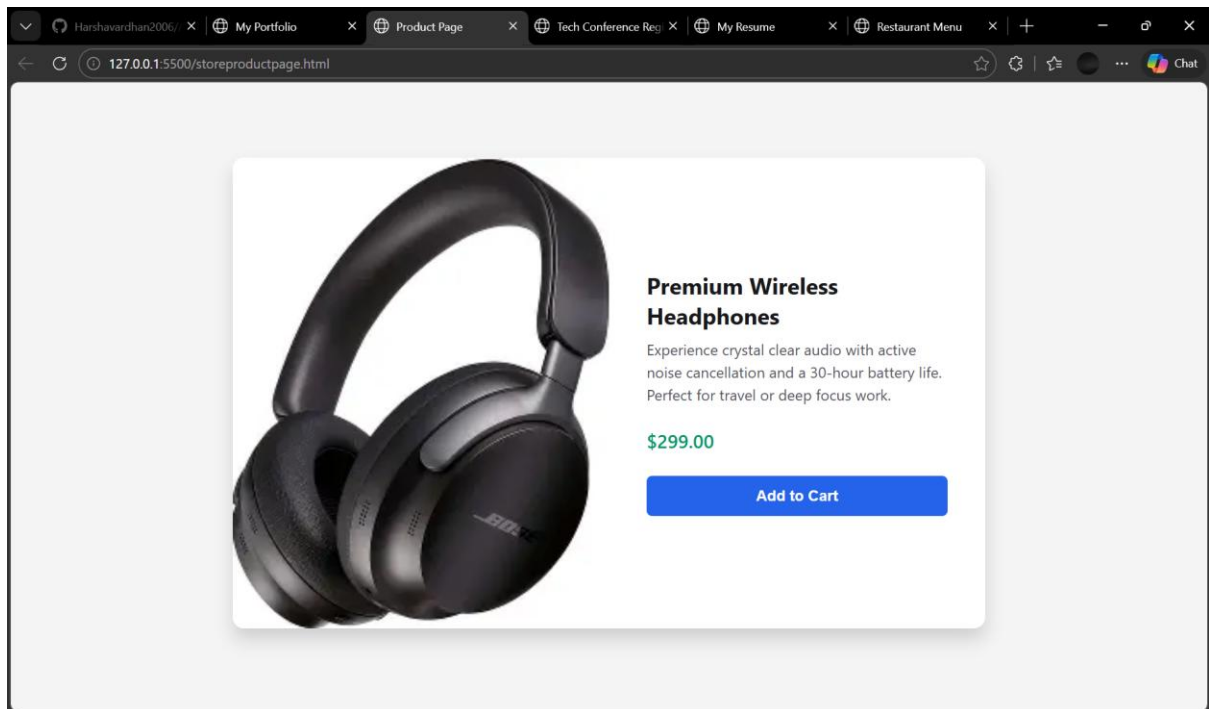

```
<!-- Create a Store Product Page, display product image, title, price, and "Add to cart" button
style with BEM methodology, make layout responsive and hover effects and "Add to cart" alert -->

<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>Product Page</title>
  <style>
    /* Base Reset */
    * {
      box-sizing: border-box;
      margin: 0;
      padding: 0;
    }

    body {
      font-family: system-ui, -apple-system, sans-serif;
      background-color: #f4f4f5;
      display: flex;
      justify-content: center;
      align-items: center;
      min-height: 100vh;
      padding: 20px;
    }

    /* BEM Block: product-card */
    .product-card {
      display: flex;
      flex-direction: column;
      background: #ffffff;
      border-radius: 12px;
      overflow: hidden;
      box-shadow: 0 4px 6px rgba(0, 0, 0, 0.1);
      max-width: 400px;
      width: 100%;
      transition: transform 0.2s ease, box-shadow 0.2s ease;
    }
  </style>
</head>
<body>
  <div class="product-card">
    <img alt="Product image" data-bbox="130 380 860 410"/>
    <div>
      <h3>Product Title</h3>
      <p>Price: $19.99</p>
      <button>Add to Cart</button>
    </div>
  </div>
</body>
</html>
```

Output:

Task 3 – Event Registration Form

Build an event registration form for a conference.

Requirements:

Collect name, email, phone number, and session selection.

Use AI to:

- Add form validation with JavaScript.
- Make the form accessible with labels and ARIA.
- Style with a professional look

CODE:

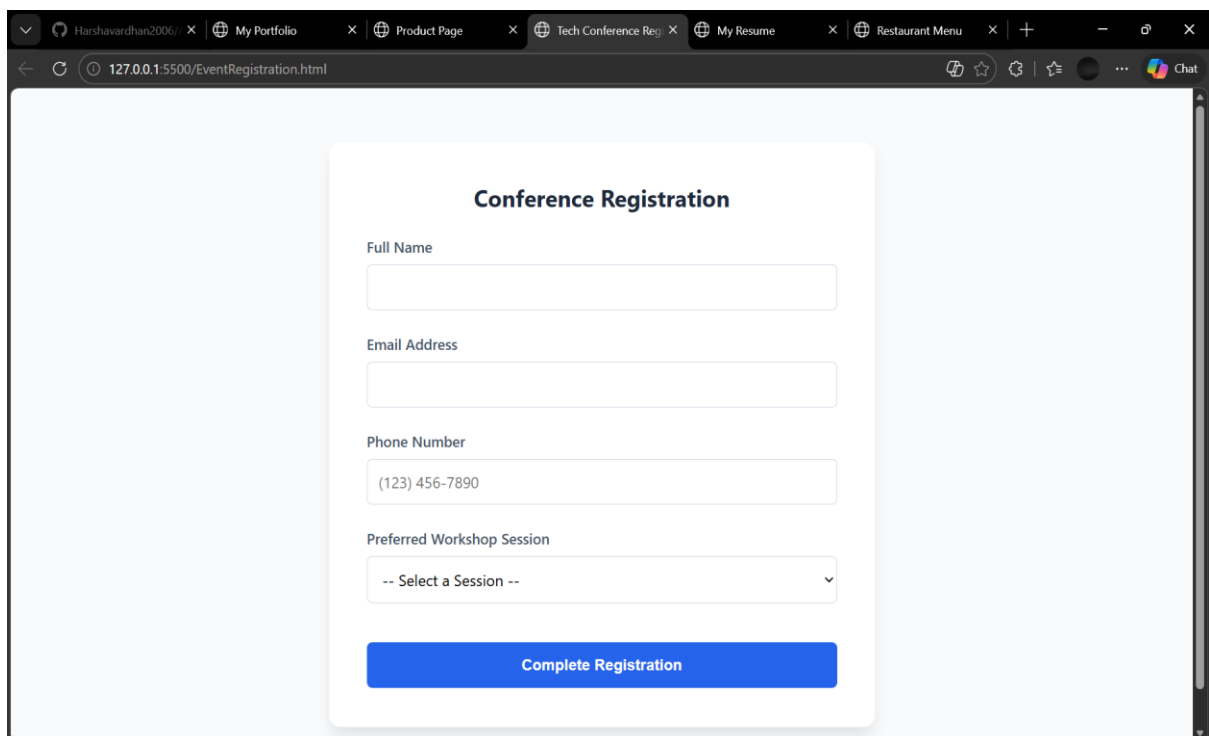

```
<!-- Create Event Registration Form which collects name, email, phone number, and session selection
add form validation with JS and make the form sccessible with labels and ARIA and style with a professional look -->

<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>Tech Conference Registration</title>
  <style>
    /* Professional Styling */
    :root {
      --primary-color: #2563eb;
      --primary-hover: #1d4ed8;
      --bg-color: #f8fafc;
      --card-bg: #ffffff;
      --text-main: #1e293b;
      --text-label: #475569;
      --border-color: #cbd5e1;
      --error-color: #dc2626;
      --success-color: #16a34a;
    }

    body {
      font-family: system-ui, -apple-system, sans-serif;
      background-color: var(--bg-color);
      color: var(--text-main);
      display: flex;
      justify-content: center;
      align-items: center;
      min-height: 100vh;
      margin: 0;
      padding: 20px;
    }

    .registration-container {
      background-color: var(--card-bg);
      padding: 2.5rem;
      border-radius: 12px;
      box-shadow: 0 10px 15px -3px rgba(0, 0, 0, 0.1);
      width: 100%;
    }
  </style>
</head>
<body>
  <div>
    <h2>Conference Registration</h2>
    <div>
      <div>Full Name</div>
      <input type="text">
    </div>
    <div>
      <div>Email Address</div>
      <input type="email">
    </div>
    <div>
      <div>Phone Number</div>
      <input type="text" value="(123) 456-7890">
    </div>
    <div>
      <div>Preferred Workshop Session</div>
      <select>
        <option>-- Select a Session --</option>
      </select>
    </div>
    <div>
      <button>Complete Registration</button>
    </div>
  </div>
</body>
</html>
```

Output:

The screenshot displays a web browser window with multiple tabs open. The active tab is titled 'Tech Conference Reg'. The address bar shows the URL '127.0.0.1:5500/EventRegistration.html'. The main content area features a 'Conference Registration' form. The form is a white card with rounded corners and a subtle shadow, centered on a light blue background. It contains the following elements:

- Form Title:** 'Conference Registration' in a bold, dark font.
- Full Name:** A text input field with a label 'Full Name' above it.
- Email Address:** A text input field with a label 'Email Address' above it.
- Phone Number:** A text input field with a label 'Phone Number' above it. The field contains the placeholder text '(123) 456-7890'.
- Preferred Workshop Session:** A dropdown menu with a label 'Preferred Workshop Session' above it. The selected option is '-- Select a Session --'.
- Complete Registration:** A blue button with white text located at the bottom of the form.

Task 4 – Resume Website

Build a one-page online resume.

Requirements:

Sections: Profile Summary, Skills, Education, Experience.

Use AI to:

- Propose professional typography styles.
- Align sections using CSS Grid.
- Add smooth scroll navigation between sections.

CODE:

```
<!-- Create a Resume Website which contains the sections profile summary, education, experience, and skills
      propose professional typography styles, align sections using CSS grid and add smooth scroll navigation between sections -->

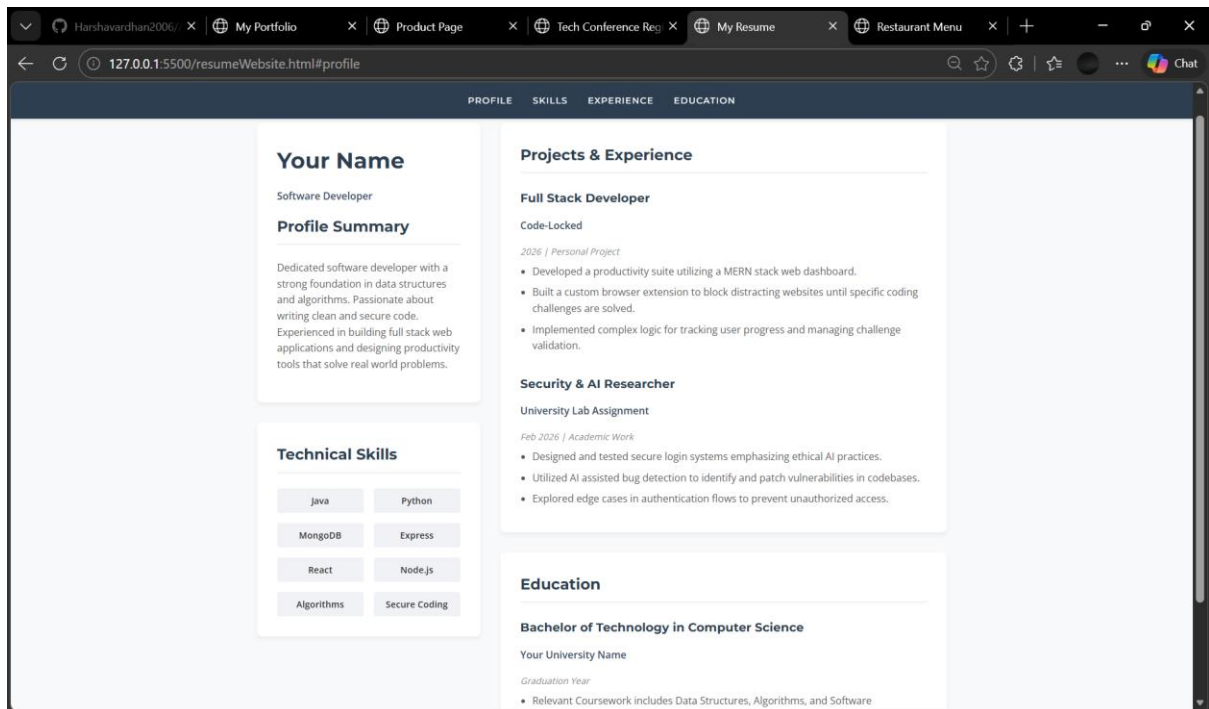

<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>My Resume</title>
  <link href="https://fonts.googleapis.com/css2?family=Montserrat:wght@500;700&family=Open+Sans:wght@400;600&display=swap" rel=
  <style>
    /* Professional Typography and Colors */
    :root {
      --bg-page: #f8f9fa;
      --bg-card: #ffffff;
      --text-main: #2b2b2b;
      --text-secondary: #5a5a5a;
      --accent-color: #2c3e50;
      --accent-light: #34495e;
      --font-heading: 'Montserrat', sans-serif;
      --font-body: 'Open Sans', sans-serif;
    }

    html {
      scroll-behavior: smooth;
    }

    body {
      margin: 0;
      padding: 0;
      font-family: var(--font-body);
      background-color: var(--bg-page);
      color: var(--text-main);
      line-height: 1.6;
    }

    /* Navigation */
    nav {
      position: fixed;
      top: 0;
      width: 100%;
```

Output:

Task 5 – Restaurant Menu Page

Design a digital menu page for a restaurant.

Requirements:

Display menu items with name, description, and price.

Use AI to:

- Suggest a food-friendly color palette.
- Design a responsive card-based layout.
- Add hover effects on menu items.

CODE:

```
<!-- create a Restaurant Menu which displays menu items with names, descriptions, and prices
Suggest a food-friendly color palette, design a responsive card-based layout and hover effects on menu items -->

<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>Restaurant Menu</title>
  <link href="https://fonts.googleapis.com/css2?family=Lora:ital,wght@0,400;0,600;1,400&family=Poppins:wght@400;600&display=swap" rel="stylesheet">
  <style>
    /* Food-friendly Color Palette */
    :root {
      --bg-color: #fffdf7; /* Creamy off-white */
      --card-bg: #ffffff; /* Pure white for cards */
      --primary-color: #c92a2a; /* Deep appetizing red */
      --accent-color: #f59f00; /* Warm golden yellow */
      --text-dark: #212529; /* Deep gray/black */
      --text-muted: #495057; /* Lighter gray for descriptions */
      --font-heading: 'Lora', serif;
      --font-body: 'Poppins', sans-serif;
    }

    body {
      margin: 0;
      padding: 0;
      font-family: var(--font-body);
      background-color: var(--bg-color);
      color: var(--text-dark);
      line-height: 1.6;
    }

    header {
      text-align: center;
      padding: 4rem 1rem 2rem;
      background-color: var(--primary-color);
      color: #ffffff;
      margin-bottom: 3rem;
      box-shadow: 0 4px 6px rgba(0,0,0,0.1);
    }
  </style>
</head>
<body>
  <h1>The Rustic Spoon</h1>
  <p>Fresh ingredients, prepared with passion.</p>
  <h2>Starters</h2>
  <div>
    <div>
      <h3>Crispy Calamari</h3>
      <span>$12</span>
      <p>Lightly dusted and fried golden brown. Served with our house-made zesty marinara sauce and a lemon wedge.</p>
    </div>
    <div>
      <h3>Roasted Bruschetta</h3>
      <span>$9</span>
